Successful Applications:

IPC’s thin film coatings have been successfully applied to the wetted parts of a wide array of Oilfield components which are subject to severely corrosive environments. Components such as valves, fittings, pipe spools, down hole completion tools etc. are some examples of what we can do.

IPC has proven coatings for Severe Service Conditions for various applications (injection wells, brine service, CO2/H2S service), in the most corrosive fields in Western Canada — Judy Creek, Brintnell, Pelican Lake, Redwater, the Bakken Play, the Cardium Play, Horn River, Provost, Winter, Zama.
